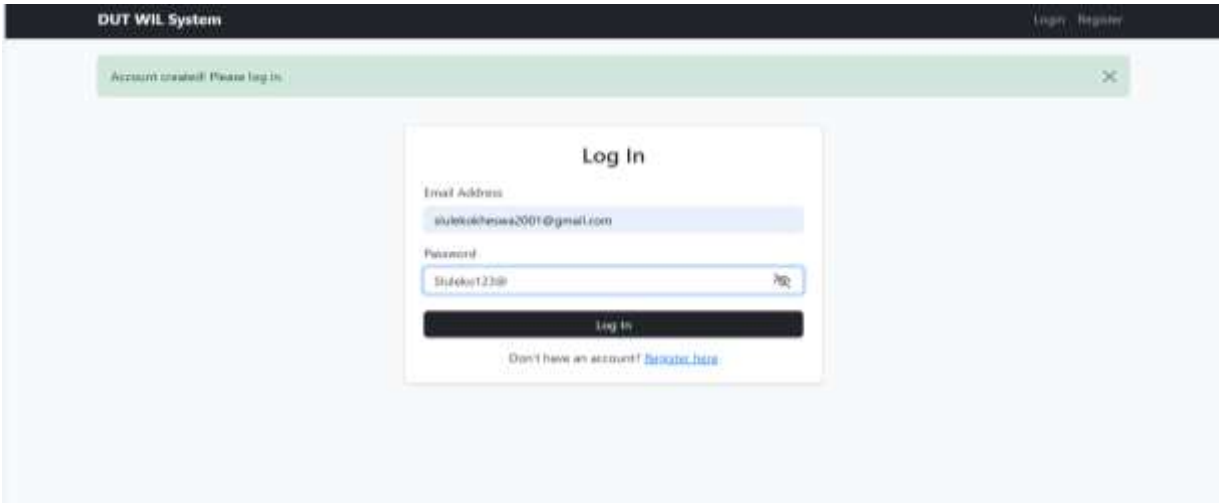
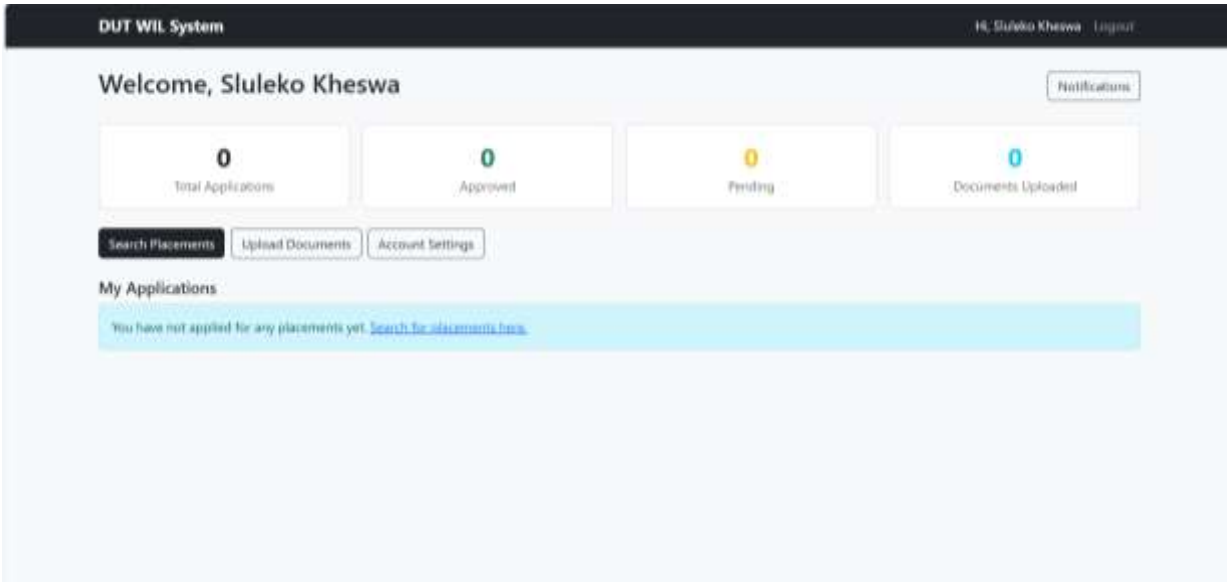
Student Task

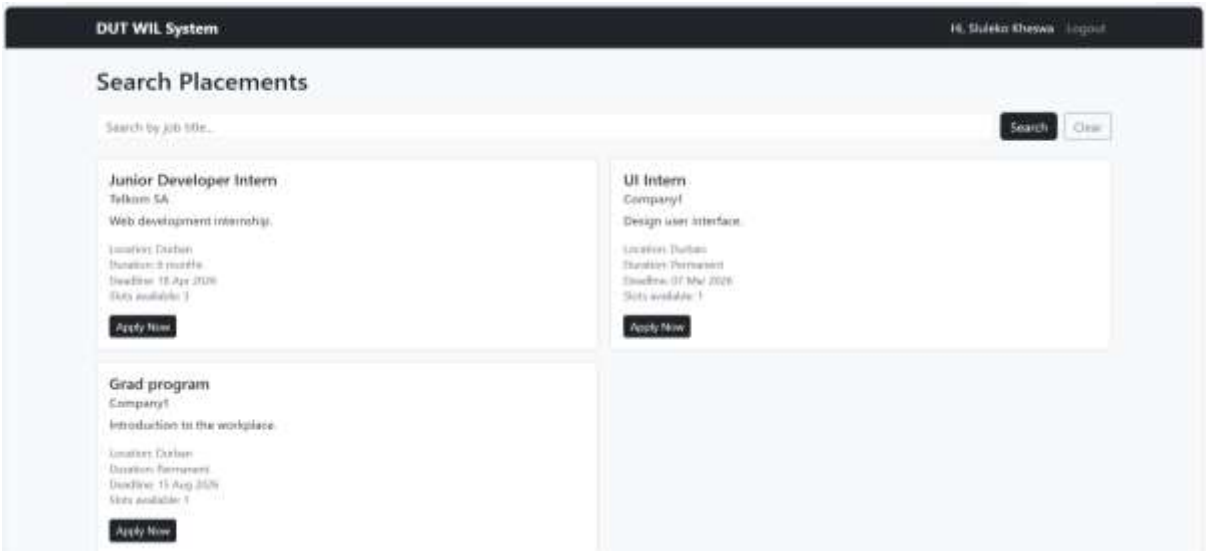
1. A student who has already registered will be able to click on the LogIn function where he/she will be able to use their chosen password and email as reference that they have created an account.



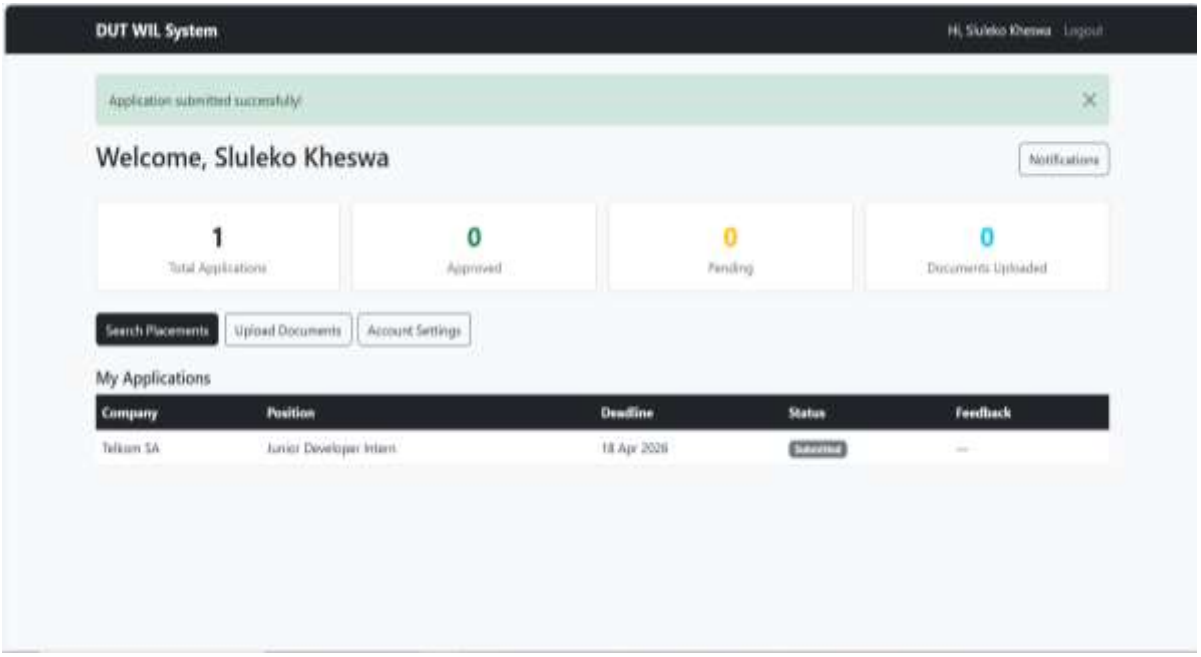
2. After Logging with their personal details they will be able to see how many application do they have and which task should they partake in, it might be uploading documents or padding applications



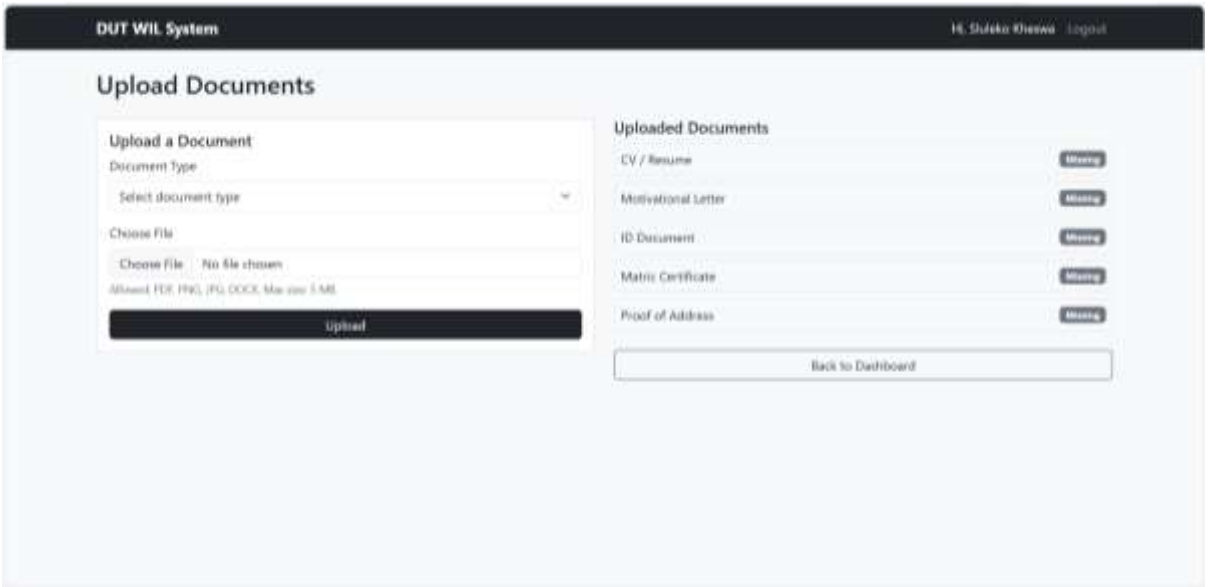
3. The user can also be able to find posted jobs, see were they fit in and which company need internes or employees.



4. User can choose a job and submit it but the applicant will need to be redirected to upload their personal documents and CV's.



5. The user/student will be allowed to choose which documentation is he/she want to upload regarding the job distraction.



These are all the step required from the User or Student who are applying and using this system for personal documentation.
